Introduction:

Detailed Summary of Navigation Menu Pro Extension:

This Extension is used for Creating Custom Menu in Magento. Using this extension you can add different type of menu links like add category, CMS page link, CMS static block content, product link, custom URL and different magento's default user links like My Account, My Wish list, Login, Logout etc.

Our extension is easy to setup and give many options which are configuring from admin.

Features of this extension:

- ⇒ Create unlimited menu group.
- ⇒ Change menu type (Mega Menu, Smart Expand, Always Expand and List Items).
- ⇒ Show/hide menu title.
- ⇒ Enable and disable menu group.
- ⇒ Display menu style (horizontally / vertically).
- ⇒ Multi column option in mega menu.
- ⇒ Column width setting.
- ⇒ Set menu sub item level (Max 5 level support).
- ⇒ Set image height/width.
- ⇒ Set Relation in the anchor tag.
- ⇒ Use external URL in the menu.
- ⇒ Display sub menu in the column.
- ⇒ Set different color option for menu items.
- ⇒ Drag gable to re-order menu links.
- ⇒ Allow to set permission for customer groups.
- ⇒ Allow Right to Left or Left to Right text direction for menu item.
- ⇒ Set Development Mode On and Off Option form the admin.
- ⇒ Publish Static HTML Menu for decrease Page loading time.
- ⇒ Easy to install, easy to upgrade, just copy to use.
- ⇒ Supported multi store and multi website.
- ⇒ Supported SUPEE-6788 Security Patches.
- ⇒ Supported magento version 1.4.1.1, 1.4.2, 1.5, 1.6, 1.6.1, 1.6.2.0, 1.7, 1.7.0.2, 1.8.0.0, 1.8.1.0, 1.9.0.0, 1.9.0.1, 1.9.1.0, 1.9.2.0, 1.9.2.1, 1.9.2.2.

Navigation Menu Pro Extension By MageBees

Installation Steps:

1. Install From Magento Connect:

Step 1: Go to admin -> System -> Tools -> Compilation. And check Compiler Status if Compiler Status is **enabled** then Please Disable Compilation.

Step 2: Go to admin -> System -> Magento Connect -> Magento Connect Manager.

You will get Following Screen.

**Enter Your admin User name
and Password.**

The image shows a 'Log In' form within a light gray box. At the top, it says 'Log In' in bold. Below that, it says 'Please re-enter your Magento Administration Credentials. Only administrators with full permissions will be able to log in.' There are two input fields: 'Username:' and 'Password:'. Below the password field is an orange 'Log In' button.

Step 3: Enter your Username and Password and when click on the login.

You will get below screen.

The image shows the main interface of the Magento Connect Manager. At the top is the 'Magentoconnect MANAGER' header. Below it are tabs for 'Extensions' and 'Settings', with 'Settings' currently selected. On the right, there are links for 'Return to Admin' and 'Log Out'. The 'Settings' section includes a checkbox for 'Put store on the maintenance mode while installing/upgrading/backup creation' (which is checked), a 'Create Backup' section with a dropdown menu set to 'Database', and an 'Install New Extensions' section with two steps: '1 Search for modules via Magento Connect.' and '2 Paste extension key to install:' followed by an 'Install' button. Below this is a 'Direct package file upload' section with two steps: '1 Download or build package file.' and '2 Upload package file:' followed by a 'Browse...' button (which has a red arrow pointing to it) and an 'Upload' button. To the right of the 'Upload' button, there is a red text overlay that says 'Select Extension Package & Click on the Upload Button'. At the bottom, there is a 'Manage Existing Extensions' section with a 'Check for Upgrades' button, and a 'Channel: Magento Community Edition' section with a 'Commit Changes' button. At the very bottom, there is a checkbox for 'Clear all sessions after successful install or upgrade:'.

Navigation Menu Pro Extension By MageBees

Select the package using Browse button and Click on the Upload Button.

You will get below screen.

Navigation Menu Pro Extension By MageBees

Click on the Return to Admin Link to Go to Admin section or Log-out and Re-Login into the admin.

2. Direct Copy & Paste the Files.

To install Navigation Menu Pro extension, you must have to follow below steps:

Step-1

Go to admin -> System -> Tools -> Compilation. And check Compiler Status if Compiler Status is **enabled** then Please Disable Compilation.

Step-2

Unpack the contents of the '**NavigationMenuPro**' folder from package file purchased.

Step-3

Copy **CapacityWebSolutions_NavigationMenuPro.xml** file from **app/etc/modules/** and put it in to your magento **app/etc/modules/** folder.

Step-4

Copy **CapacityWebSolutions** folder from **app/code/community/** and put it in to your magento **app/code/community/** folder.

Step-5

Copy **navigationmenupro** folder from **app/design/adminhtml/default/default/template/** and put it in to your magento **app/design/adminhtml/default/default/template/** folder.

Step-6

Copy **navigationmenupro.xml** file from **app/design/adminhtml/default/default/layout/** and put it in to your magento **app/design/adminhtml/default/default/layout/** folder.

Step-7

Copy **navigationmenupro** folder from **app/design/frontend/base/default/template/** and put it in to your magento **app/design/frontend/<your package>/<Your theme>/template/** folder.

Navigation Menu Pro Extension By MageBees

Step-8

Copy **navigationmenupro.xml** file from **app/design/frontend/base/default/layout/** and put it in to your magento **app/design/frontend/<your package>/<Your theme>/layout/** folder.

Step-9

Copy **navigationmenupro** folder from js folder and put it in to your magento's root directory **js** folder.

Step-10

Copy **navigationmenupro** folder from **skin/adminhtml/default/default/** and put it in to your magento's root directory **skin/adminhtml/default/default/** folder.

Step-11

Copy **css** folder from **skin/frontend/base/default/css/** and put it in to your magento's root directory **skin/frontend/base/default/css/** folder.

Step-12

Make sure to clear cache in admin of Magento. Please logout from admin account and login again.

Note: When you unpack the contents of the 'NavigationMenuPro' folder from package file purchased then you will get package.xml file at the root folder. Do not need to upload that file.

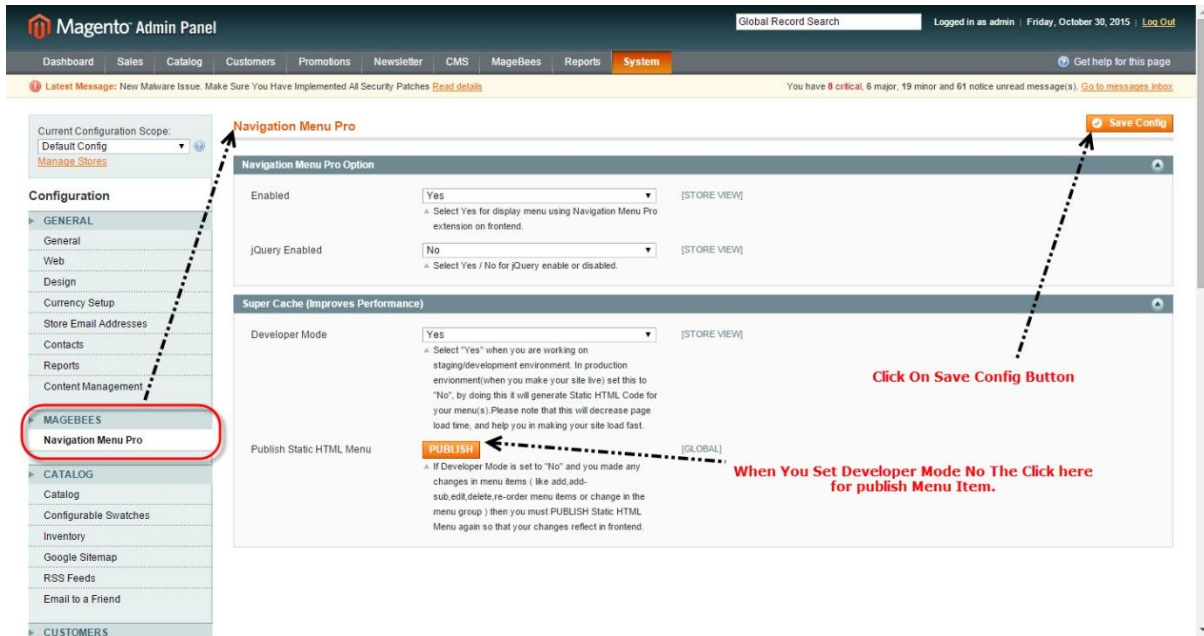

Navigation Menu Pro Extension By MageBees

Configuration Settings:

You must have to follow below steps:

Navigation Menu Pro Extension By MageBees

Please See Below Image for easily Understanding how color Options are working on the frontend:

Navigation Menu Pro Extension By MageBees

Title: Enter group name, such as Main menu, Left menu, Top menu ..., so you can easily remember the menu group.

Status: You can Enable & Disable the Menu using the menu group.

Show Hide Group Title: You can show and hide the group title on the frontend.

Menu Type: There are main four menu types available.

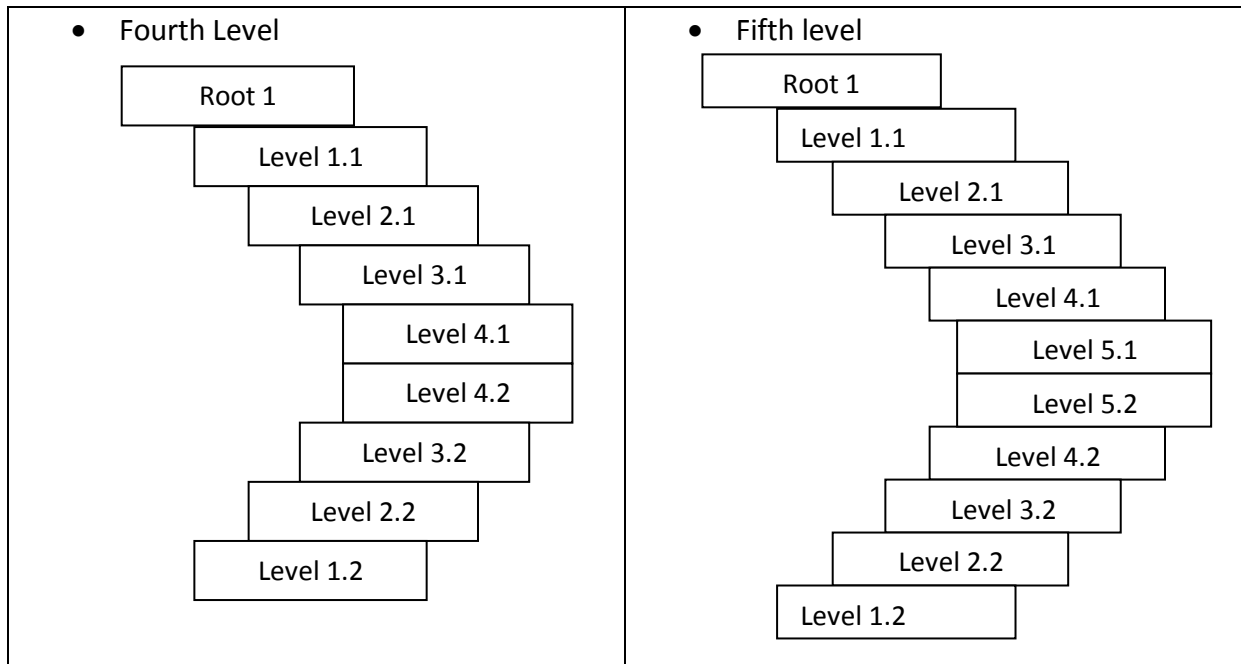

- Mega-menu.
- Smart Expand.
- Always Expand.
- List Item.

In the Mega-Menu there is one more option Alignment Horizontal and Vertical.

Item Level: Here Menu Item different Option listed below.

• Only Root Level Root 1 Root 2 Root 3	• First Level Root 1 Level 1.1 Level 1.2
• Second level Root 1 Level 1.1 Level 2.1 Level 2.2 Level 1.2	• Third Level Root 1 Level 1.1 Level 2.1 Level 3.1 Level 3.2 Level 2.2 Level 1.2

Navigation Menu Pro Extension By MageBees

Direction: Set Menu Item language direction, Set Left to Right for normal language. Set Right to Left for Arabic languages. By default we used Left to Right direction.

Image height / Image width: Set Image Height and Width for the menu items.

When you save the Menu group then you will get the Menu Embedded Code tab in the menu group form.

You will get Following Screen.

Navigation Menu Pro Group

Menu Group

Menu Embedded Code

Edit Group 'Main Menu' Information

Back Reset Delete Group Save Group Save Group And Continue Edit

Embedded Information

Insert into Static Block Or CMS Page

```
{{block type="navigationmenupro/menucreator" name="menucreator_group_1" group_id="1" template="navigationmenupro/menucreator.phtml"}}
```

Reference Via XML Layout File

```
<block type="navigationmenupro/menucreator" name="menucreator_group_1" template="navigationmenupro/menucreator.phtml"><action method="setGroupid"><value>1</value></action><action method="setCssJs"><value>1</value></action></block>
```

Call Via Frontend Template File

```
<?php echo $this->getLayout()->createBlock("navigationmenupro/menucreator")->setGroup_id(1)->setTemplate("navigationmenupro/menucreator.phtml")->toHtml();?>
```

After creating group you will get embedded code. Use this embedded code as per your requirements. There are below three methods available. Here group_id=1;

Navigation Menu Pro Extension By MageBees

1) Insert into Static block or CMS page:

```
{{block type="navigationmenupro/menucreator" name="menucreator_group_1"
group_id="1" template="navigationmenupro/menucreator.phtml"}}
```

2) Reference via XML layout file:

```
<block type="navigationmenupro/menucreator" name="menucreator_group_1"
template="navigationmenupro/menucreator.phtml">
<action method="setGroupId"> <value>1 </value> </action>
<action method="setCssJs"> <value>1 </value> </action>
</block>
```

3) Call via frontend template file:

```
<?php echo $this->getLayout()-
>createBlock("navigationmenupro/menucreator")->setGroup_id(1)-
>setTemplate("navigationmenupro/menucreator.phtml")->toHtml();?>
```

Replace magento top menu with Our Navigation Menu:

Open Following given file.

app\design\frontend\<yourpackage>\<yourtheme>\template\page\html\header.phtml
file.

Find `<?php echo $this->getChildHtml('topMenu') ?>` and comment or remove this code and put below mention code there in the header.phtml file.

```
<?php echo $this->getLayout()->createBlock("navigationmenupro/menucreator")-
>setGroup_id(1)->setTemplate("navigationmenupro/menucreator.phtml")->toHtml();?>
```

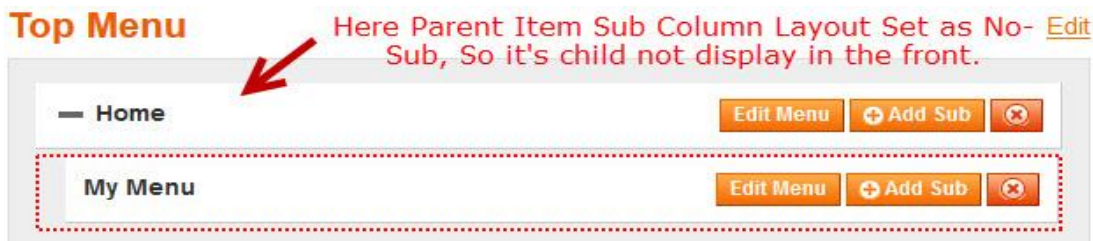

Go to admin top menu MageBees -> Navigation Menu Pro -> Manage Menu Items for create new menu item. You will get Following Screen.

Navigation Menu Pro Extension By MageBees

All Menu Item will be managing from navigation menu pro manage menu items. Here you can add new menu as well as delete and update menu items easily.

- ⇒ You can directly drag and drop menu items from one group to another group.
- ⇒ Also you can change Parent and child menu item using the drag and drop and then click on the **Save Order** button which is set at the bottom for change the menu order.
- ⇒ You can get menu items store view wise by choosing store view from Choose Store view drop down.
- ⇒ There are two kind of option to delete the menu items.
 - Delete only parent item.
 - Delete parent and child both menu item.
- ⇒ **When Menu item's Sub Column Layout is set as a No Sub Item then its child element is not display in the frontend.**

Ex: Here set 1-column layout for the Home menu item then its child menu is displayed on frontend.

- ⇒ **When Menu item is static block and its column layout is not set then its content is not display in the frontend.**

Navigation Menu Pro Extension By MageBees

Here, Static block's sub column layout is not set then static block content is not displayed in front.

Set Static block Column Layout For displayed the static block content in the menu.

⇒ **When menu item type is group and you drag that item as root item then it will not display at the frontend.**

Set Group type menu item as child menu item for creating the columns.

Menu Item Type:

In the Menu there are different item types available for the menu items.

- **Login:** Create link to login page. If user is not logged in then only this menu type of menu item will displayed in the front.
- **Logout:** Create link to logout action. If user is logged in then only this menu type of menu item will displayed in the front.
- **Register:** Create link to register page. If user is not logged in then only this menu type of menu item will displayed in the front.
- **Contact Us:** Create link to contact us page.
- **Status:** Status is use for enabled and disabled the menu item in the menu group. Disabled menu item is not displayed on the frontend. Men's T-Shirts menu item set as disable so its display like below:

Top Menu

[Edit](#)

Navigation Menu Pro Extension By MageBees

Menu Title: Menu Title is use for display menu item title on the frontend.

Add Custom Class: Using this you can add the custom class on the menu item.

Assign Menu Group: Using this you can assign the menu group on the menu item. So that menu item is set in that menu group which is selected in the Assign Menu Group.

Parent Item: In the Parent Item display all menu items base on the selected group from the Assign Menu Group drop down.

Visible In: Using this you can select multiple store view so current menu item is visible for the selected store.

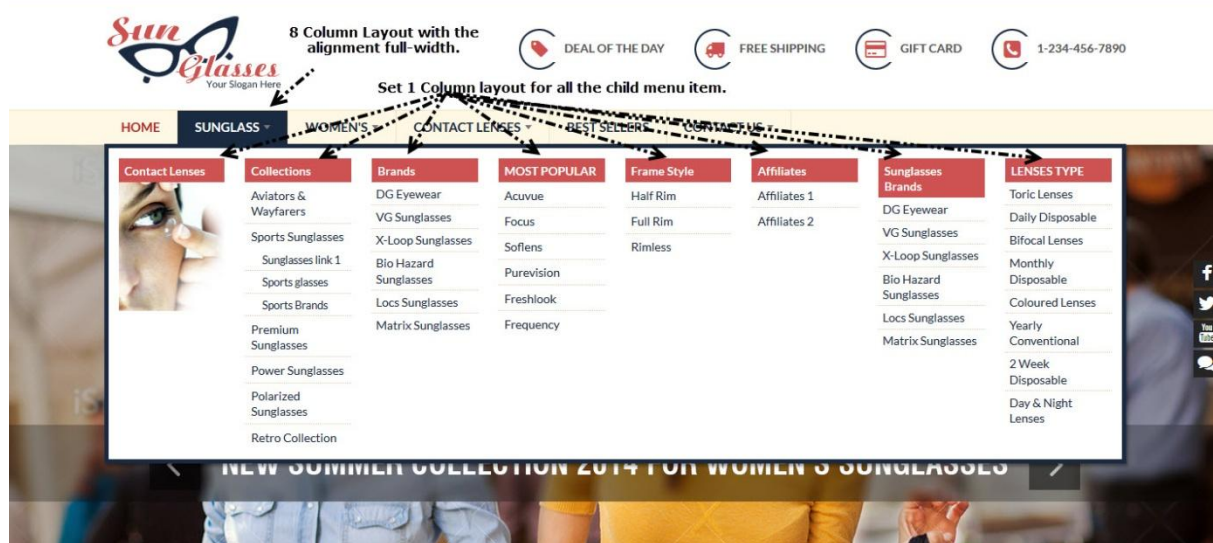

Sub Column Layout: This option will work only in mega menu type. Using this you can set dropdown menu layout.

- No Sub Item – Child Menu Item not display in the menu when menu item Sub Column Layout set as No Sub.
- 1 Column Layout. – Dropdown menu will set fly out menu.
- 2 Column Layouts. – Dropdown menu will set in two columns.
- 3 Column Layouts. – Dropdown menu will set in three columns.
- 4 Column Layouts. – Dropdown menu will set in four columns.
- 5 Column Layouts. – Dropdown menu will set in five columns.
- 6 Column Layouts. – Dropdown menu will set in six columns.
- 7 Column Layouts. – Dropdown menu will set in seven columns.
- 8 Column Layouts. – Dropdown menu will set in eight columns.

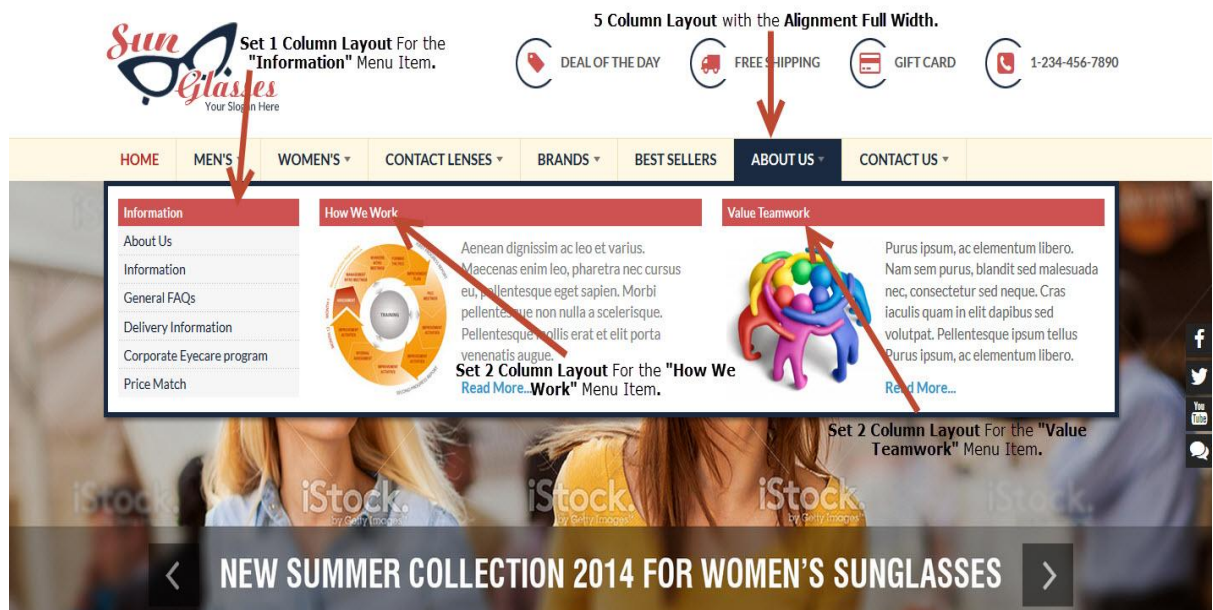

When menu item is not root level this option will work for set column width.

Navigation Menu Pro Extension By MageBees

Here root item set 8 columns full widths. With all Sub item set 1 column layout.

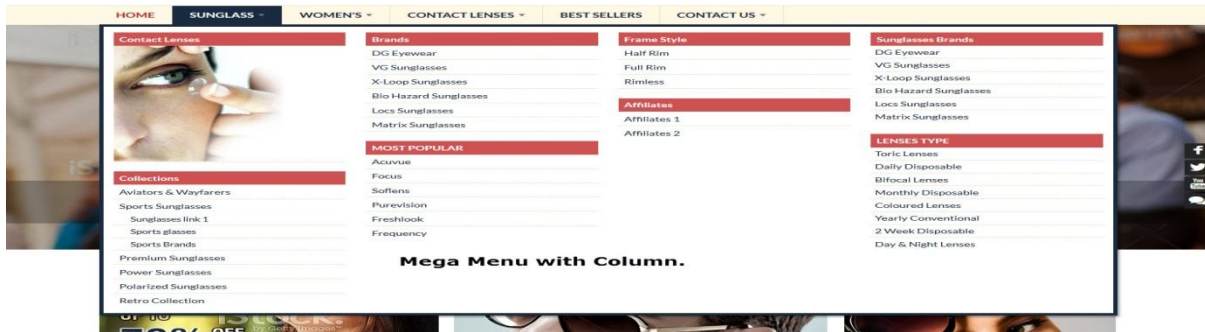

Here root item set 5 column full widths. Sub first box set 1 column and last two box set 2 column widths.

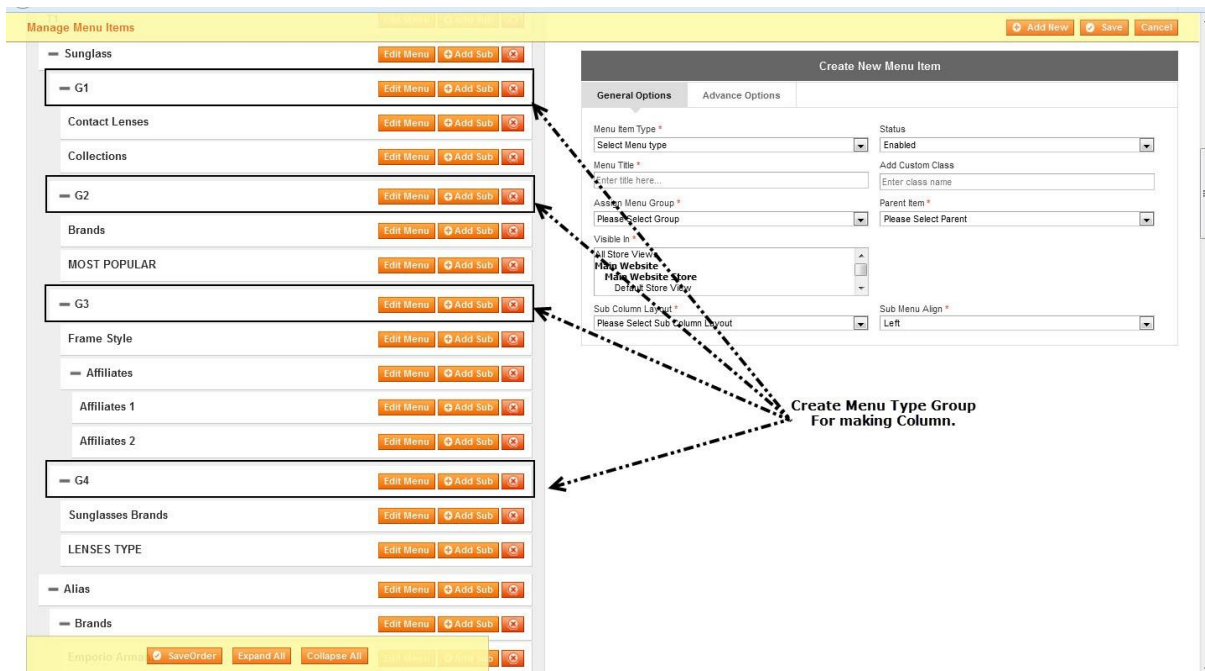

Here use mage menu with the sub columns.

Navigation Menu Pro Extension By MageBees

For making Column in the sub menu item you need to use the Group menu type.

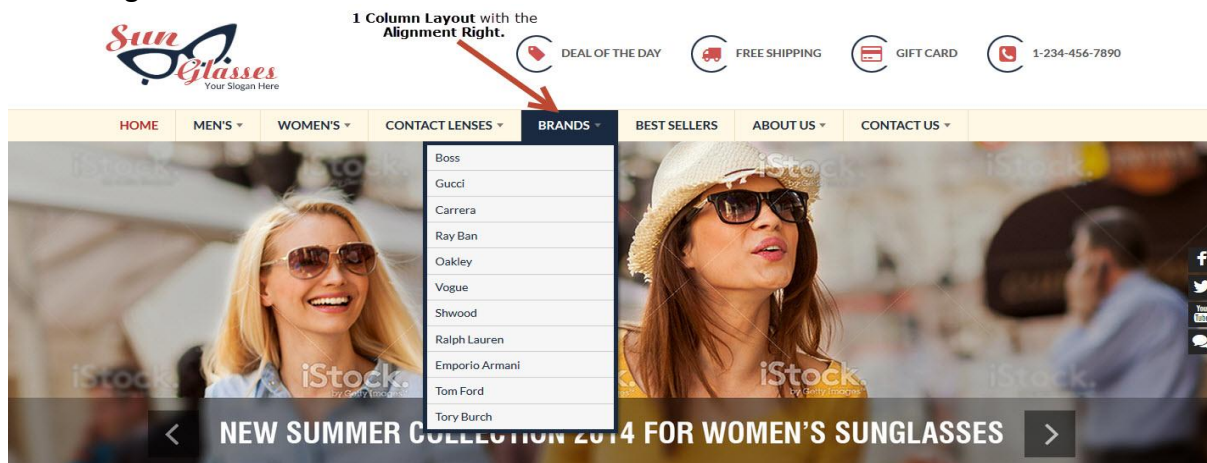

Sub Menu Align: With the help of this option you can manage the menu alignment. Following are the different alignment options examples.

- Left

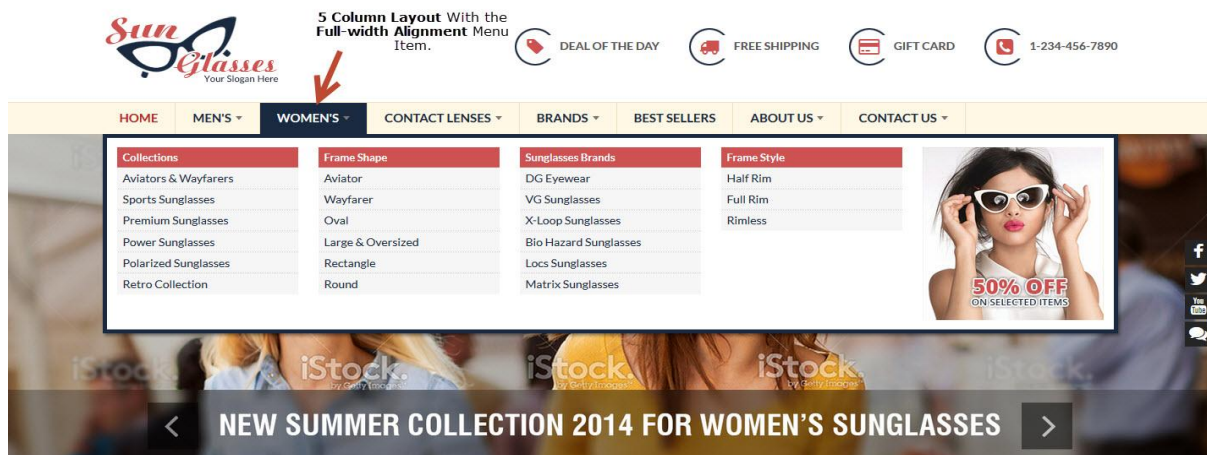

Navigation Menu Pro Extension By MageBees

- Right

- Full Width

Access Permission: Using this you can Set Permission on the menu item base on the magento customer group.

- **Public:** Every one can access the menu item. When we need to access the menu item for all if customer is logged in or not then assign the menu item Access Permission to the Public.
- **Registered:** User who is logged in site as customer then only access the menu item. When we need to give permission for the logged customer then assign the menu item Access permission to the Registered.
- **Not Logged In:** If Customer is not logged in then only access the menu item.
- **General:** When Menu Item Access Permission as General is accessible when customer is logged in and customer's group is general.
- **Wholesale:** When Menu Item Access Permission as Wholesale is accessible when customer is logged in and customer's group is wholesale.

Navigation Menu Pro Extension By MageBees

- **Retailer:** When Menu Item Access Permission as Retailer is accessible when customer is logged in and customer's group is retailer.

Target Window: Using this set a target as current window or new window using the Parent or New window option.

Custom Link Title: Using this set the link title for the SEO.

Set Relation: Using this set a relationship between the current document and the linked document.

Upload Item Thumbnail: Using this you can set the menu item image. When menu item type is not category then only this option is available.

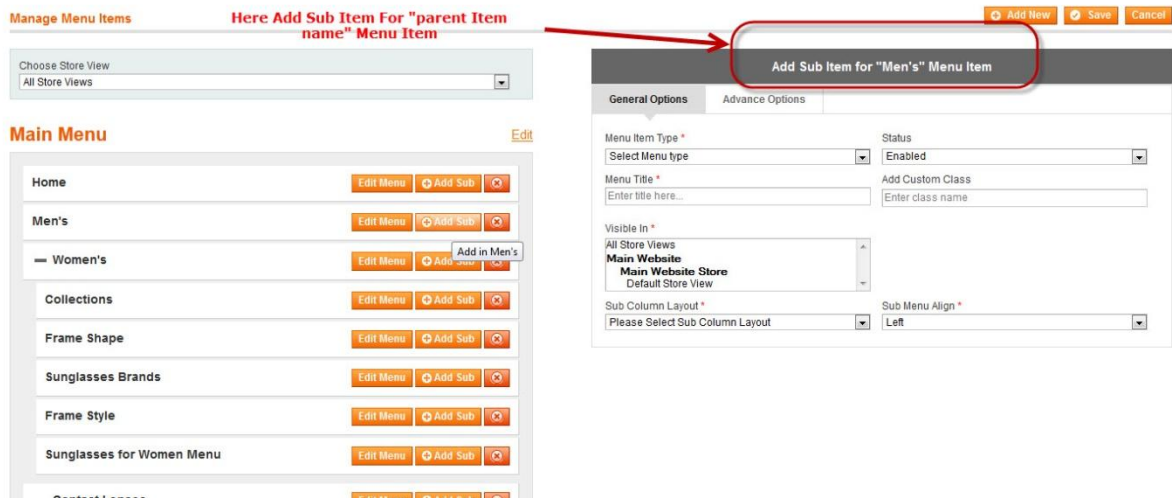

Show/Hide Thumbnail: Using this you can show or hide the uploaded Image on the frontend.

Edit Menu Item:

The screenshot displays the 'Manage Menu Items' interface on the left and the 'Edit "Home" Menu Item' form on the right. The 'Manage Menu Items' screen shows a list of menu items under the 'Main Menu' category, including 'Home', 'Men's', 'Women's', 'Collections', 'Frame Shape', 'Sunglasses Brands', 'Frame Style', 'Sunglasses for Women Menu', and 'Contact Lenses'. Each item has an 'Edit Menu' button. A red arrow points to the 'Edit Menu' button for the 'Home' item, with the text 'Click on Edit Menu button to edit menu item.' above it. The 'Edit "Home" Menu Item' form has two tabs: 'General Options' and 'Advance Options'. The 'General Options' tab is active, showing fields for 'Menu Item Type' (CMS Page), 'Status' (Enabled), 'Select Cms Pages' (Welcome To Sunglasses Store), 'Menu Title' (Home), 'Assign Menu Group' (Main Menu), 'Visible in' (All Store Views, Main Website, Main Website Store, Default Store View), 'Sub Column Layout' (No Sub Item), and 'Sub Menu Align' (Left). The 'Advance Options' tab is also visible.

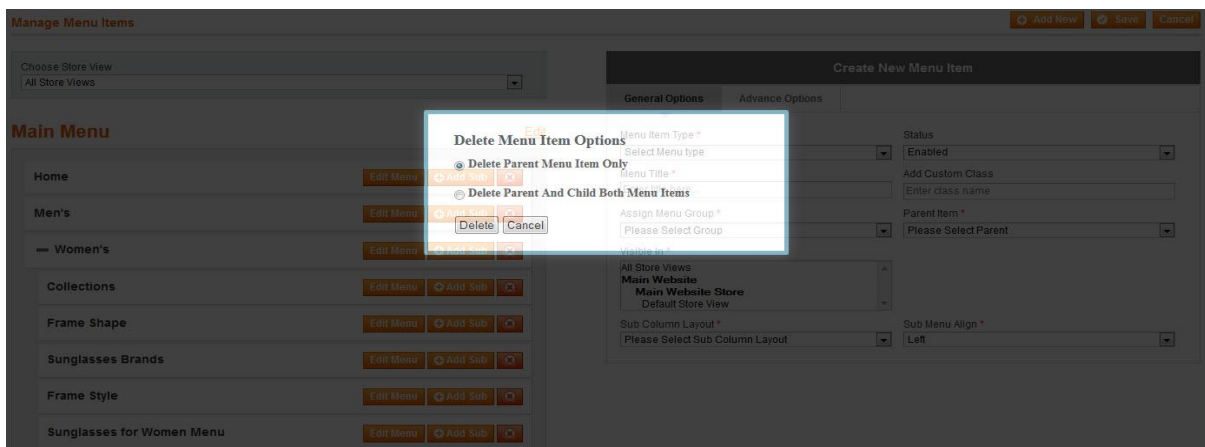

Navigation Menu Pro Extension By MageBees

Add Sub Item:

Note: When you try to use Add Sub then Assign Menu Group and Parent Item drop down is not displayed because that value is automatically set base on the click on the auto sub button.

Delete Menu Item:

- ⇒ **Delete Parent Item Only:** Using this you can delete current item and if it has child element then it will make as root menu item.
- ⇒ **Delete Parent And Child Both Menu Items:** Using this you can delete current item and its entire child menu items.

"NEQUE PORRO QUISQUAM EST QUI DOLOREM IPSUM QUIA DOLOR SIT AMET. CONSECTETUR, ADIPISCI VELIT..."

"THERE IS NO ONE WHO LOVES PAIN ITSELF, WHO SEEKS AFTER IT AND WANTS TO HAVE IT, SIMPLY BECAUSE IT IS PAIN..."

Contrary to popular belief, Lorem Ipsum is not simply random text. It has roots in a piece of classical Latin literature from 45 BC, making it over 2000 years old. Richard McClintock, a Latin professor at Hampden-Sydney College in Virginia, looked up one of the more obscure Latin words, consectetur, from a Lorem Ipsum passage, and going through the cites of the word in classical literature, discovered the undoubtable source. Lorem Ipsum comes from sections 1.10.32 and 1.10.33 of "de Finibus Bonorum et Malorum" (The Extremes of Good and Evil) by Cicero, written in 45 BC. This book is a treatise on the theory of ethics, very popular during the Renaissance. The first line of Lorem Ipsum, "Lorem ipsum dolor sit amet...", comes from a line in section 1.10.32.

THE STANDARD LOREM IPSUM PASSAGE, USED SINCE THE 1500S

"Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum."

SECTION 1.10.32 OF "DE FINIBUS BONORUM ET MALORUM", WRITTEN BY CICERO IN 45 BC

"Sed ut perspiciatis unde omnis iste natus error sit voluptatem accusantium doloremque laudantium, totam rem aperiam, eaque ipsa quae ab illo inventore veritatis et quasi architecto beatae vitae dicta sunt explicabo. Nemo enim ipsam voluptatem quia voluptas sit aspernatur aut odit aut fugit, sed quia consequuntur magni dolores eos qui ratione voluptatem sequi nesciunt. Neque porro quisquam est, qui dolorem ipsum quia dolor sit amet, consectetur, adipisci velit, sed quia non numquam eius modi tempora incidunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim ad minima veniam, quis nostrum exercitationem ullam corporis suscipit laboriosam, nisi ut aliquid ex ea commodi consequatur? Quis autem vel eum iure reprehenderit qui in ea voluptate velit esse quam nihil molestiae consequatur, vel illum qui dolorem eum fugiat quo voluptas nulla pariatur?"

1914 TRANSLATION BY H. RACKHAM

"But I must explain to you how all this mistaken idea of denouncing pleasure and praising pain was born and I will give you a complete account of the system, and expound the actual teachings of the great explorer of the truth, the master-builder of human happiness. No one rejects, dislikes, or avoids pleasure itself, because it is pleasure, but because those who do not know how to pursue pleasure rationally encounter consequences that are extremely painful. Nor again is there anyone who loves or pursues or desires to obtain pain of itself, because it is pain, but because occasionally circumstances occur in which toil and pain can procure him some great pleasure. To take a trivial example, which of us ever undertakes laborious physical exercise, except to obtain some advantage from it? But who has any right to find fault with a man who chooses to enjoy a pleasure that has no annoying consequences, or one who avoids a pain that produces no resultant pleasure?"

SECTION 1.10.33 OF "DE FINIBUS BONORUM ET MALORUM", WRITTEN BY CICERO IN 45 BC

"At vero eos et accusamus et iusto odio dignissimos ducimus qui blanditiis praesentium voluptatum deleniti atque corrupti quos dolores et quas molestias excepturi sint occaecati cupiditate non provident, similique sunt in culpa qui officia deserunt mollitia animi, id est laborum et dolorum fuga. Et harum quidem rerum facilis est et expedita distinctio. Nam libero tempore, cum soluta nobis est eligendi optio cumque nihil impedit quo minus id quod maxime placeat facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet ut et voluptates repudiandae sint et molestiae non recusandae. Itaque earum rerum hic tenetur a sapiente delectus, ut aut reiciendis voluptatibus maiores alias consequatur aut perferendis doloribus asperiores repellat."

1914 TRANSLATION BY H. RACKHAM

"On the other hand, we denounce with righteous indignation and dislike men who are so beguiled and demoralized by the charms of pleasure of the moment, so blinded by desire, that they cannot foresee the pain and trouble that are bound to ensue; and equal blame belongs to those who fail in their duty through weakness of will, which is the same as saying through shrinking from toil and pain. These cases are perfectly simple and easy to distinguish. In a free hour, when our power of choice is untrammelled and when nothing prevents our being able to do what we like best, every pleasure is to be welcomed and every pain avoided. But in certain circumstances and owing to the claims of duty or the obligations of business it will frequently occur that pleasures have to be repudiated and annoyances accepted. The wise man therefore always holds in these matters to this principle of selection: he rejects pleasures to secure other greater pleasures, or else he endures pains to avoid worse pains."

Navigation Menu Pro Extension By MageBees

FAQ:-

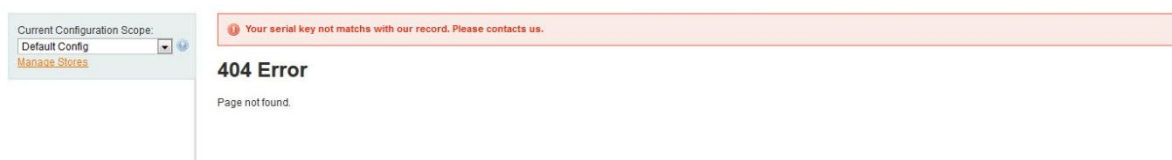

Q-1:- I have installed Navigation Menu Pro Extension Using Magento Connect Manager. But When I am login into my magento admin then it will give following error.

Solution: - This type of issue occurred when Compilation is enable in your magento store. Please disable our extension from
<YourMagentoRoot>/app/etc/modules/CapacityWebSolutions_NavigationMenuPro.xml file.

- For disable our extension by setting <active>false</active> tag in the above mention file.
- Rename var folder to var-old which is available in your Magento Root directory.
- Please Re-Compile your magento store. Once Re-Compilation is completed then enable our extension by setting <active>true</active> tag.
- Please refresh all magento cache and Log-out from the admin and Re-Login into the admin.

Q-2:- I have installed Navigation Menu Pro Extension. But When I click on Navigation Menu Pro tab in the configuration page will get a 404. :(.

Solution: - After installing Navigation Menu Pro Extension. Please Logout from admin account and Re-login and Refresh Cache.

Q-3:- How to display Menu on the Frontend?

Solution: - After creating the groups you will get embed code for that group using that displayed menu on the frontend. There are 3 methods available. Here group_id=1;

Navigation Menu Pro Extension By MageBees

1) Insert into Static block or CMS page:

```
{{block type="navigationmenupro/menucreator" name="menucreator_group_1"
group_id="1" template="navigationmenupro/menucreator.phtml" }}
```

2) Reference via XML layout file:

```
<block type="navigationmenupro/menucreator" name="menucreator_group_1"
template="navigationmenupro/menucreator.phtml">
<action method="setGroupId"><value>1</value></action>
<action method="setCssJs"><value>1</value></action>
</block>
```

3) Call via frontend template file:

```
<?php echo $this->getLayout()->createBlock("navigationmenupro/menucreator")-
>setGroup_id(1)->setTemplate("navigationmenupro/menucreator.phtml")-
>toHtml();?>
```

Q-4:- How to replace magento top menu with the Navigation Menu?

Solution: - Open Following given file.

app\design\frontend\<yourpackage>\<yourtheme>\template\page\html\header.phtml file.

Find <?php echo \$this->getChildHtml('topMenu') ?> and comment or remove this code and put below mention code there in the header.phtml file.

```
<?php echo $this->getLayout()->createBlock("navigationmenupro/menucreator")-
>setGroup_id(1)->setTemplate("navigationmenupro/menucreator.phtml")->toHtml();?>
```

Here group_id=1; so we need to change the group id when you use this code to display menu in the front.

Q-5:- Auto show subcategories not working in the menu?

Solution: - Menu Item which is making as the Auto Sub has child menu item then auto sub is not working in that menu item. Make sure assigned all subcategories activated, and select YES in "Include in Navigation Menu" option.

Navigation Menu Pro Extension By MageBees

Q-6: Any Changes like add, edit, add-sub, delete menu-items or change in the menu group then it's effect are not displayed at the Front?

Solution: - Go to MageBees -> Navigation Menu Pro -> Navigation Menu Pro Setting and follow below mention points.

- ⇒ Check Developer Mode is set as "No" then click on the "PUBLISH" button for display new changes on frontend.
- ⇒ If developer mode is set as "Yes" and still new changes are not displayed on the frontend then Refresh magento cache From System -> Cache Management.

Q-7: I applied the 6788 patch on my magento setup, a navigationmenupro block doesn't show up on home page or any cms page when we call it from the static block or cms page from admin using following method.

```
{{block type="navigationmenupro/menucreator" name="menucreator_group_1"
group_id="1" template="navigationmenupro/menucreator.phtml" }}
```

Solution:

- ⇒ Go to admin -> System -> Permissions -> Block
- ⇒ Click on **Add New Block** and fill details as follow:

Block Details	
Block Name *	navigationmenupro/menucreator
Is Allowed	Yes

- ⇒ Now menu creator block has permission to display.

Thank you!
